PROFILE

Entrepreneur and technical engineer with a background spanning payment infrastructure, core banking, and agri-tech. Founder of Herdbase Africa Limited, building Nigeria's first systematic livestock management platform. Combines deep technical fluency API integration, payment gateway deployment with hands-on product and business leadership. Currently pursuing an MBA to formalize the bridge between worlds of business and agriculture.

WORK EXPERIENCE

Founder | *Herdbase Africa Limited* | Katsina, Nigeria 2023 – Present

- Founded an agri-tech venture to systematize livestock farming across Nigeria, targeting cattle,sheep, goat, and poultry operations with species-specific digital workflows.
- Leading product development on Herdbase360: a multi-role SaaS platform covering farm operations, reproduction tracking, veterinary alerting, health records, and consultant access.

Team Lead, Web Merchant Platforms | *Unified Payments Services PLC* | Lagos 2023 – 2025

- Led technical implementation of EMV 3DS 2.0 solutions (3DS Server, ACS) for major Nigerian payment gateways including Remita, Paystack, Flutterwave, and Moniepoint.
- Set up, configured, and deployed Payloft Gateway — managing the full technical lifecycle from requirements through go-live.
- Developed and maintained functional and technical requirements for payment projects, producing user and operations documentation across all new solution launches.
- Tested and validated API integrations that expanded eCommerce platform acceptability across merchant segments.

IT Support Staff | *Access Bank PLC* | Katsina State 2022 – 2023

- Provided front-line and escalated IT support, resolving issues within defined TATs while maintaining transaction accuracy and system uptime.
- Tracked and documented all transactions, bank supply movements, and customer records; ensured data integrity across internal systems.
- Stayed current with product and process updates across Access Bank's consumer and business banking suite.
- Managed and maintained banking systems, core applications, and peripheral devices (ATMs, printers, POS systems).
- Monitored system performance and escalated issues to relevant teams to ensure minimal service disruption.
- Supported routine updates, system patches, and antivirus deployment across workstations.

Software Developer | *Cloudsoft Consulting Ltd.* | Kaduna State 2019 – 2020

- Developed and maintained client software projects, handling full-cycle delivery from technical design through testing and documentation.
- Standardized development processes and produced complete technical documentation for all deployed products.
